

MEng Design Project Materials Inventory

TGR-LoRA: A Continual Learning Pipeline for Small Language Models

Student: Beichen Yu (by325)

Program: Master of Engineering, Electrical and Computer Engineering, Cornell University

Advisor(s): Adit Jain; Vikram Krishnamurthy

Project Type: Software-only project. No physical hardware prototype.

Date: May 2026

Primary Storage Location

All project materials are stored in the following GitHub repository:

<https://github.com/byu959397-cell/ECE-5996-design-proj-code>

Materials Included

1. Final Report

- Final MEng design project report PDF submitted on Canvas.
- A copy of the final report is also stored in the GitHub repository.

2. Poster

- Final project poster PDF submitted on Canvas.
- Final project poster PDF is also stored in the GitHub repository.

3. Source Code

- `main.py`
- `trainers.py`
- `ortho_hist_lora.py`
- `config.py`
- `data_trace.py`
- `eval_trace.py`
- `checkpointing.py`
- `analysis_utils.py`
- `summarise_results.py`
- `run_experiments.sh`

4. Configuration Files

- `sequential_lora.yaml`
- `ortho_hist_k4.yaml`
- `ortho_hist_k8.yaml`
- `ortho_hist_k16.yaml`

5. Experimental Result Files

- `sequential_history.json`
- `k4.json`
- `k8_history.json`
- `k16.json`

6. Environment and Reproducibility Files

- `README.md`
- `requirements.txt`
- Experiment commands and output descriptions are included in the README and final report.

7. Dataset Information

- TRACE-style dataset expected under `./TRACE/`.
- The official TRACE source is referenced in the README and final report.
- Raw dataset files are not physically submitted as the size is quite large.

8. Hardware / Prototype Materials

- No physical hardware prototype was produced for this project.
- Experiments were run using cloud GPU environments, including Colab and AutoDL.
- Therefore, no hardware box or physical prototype return is required.

Physical Storage / Handoff Note

This is a software-only project. There are no physical devices, prototypes, sensors, circuit boards, or lab materials to return. The complete project handoff location is the GitHub repository listed above. If a printed copy is required, this inventory page may be printed and provided to the advisor or project coordinator.
